Professional Summary

- Software Engineer with hands-on experience building scalable backend services and customer-facing web apps using Python, REST APIs, and SQL, with strong fundamentals in data structures, algorithms, and OOP.
- Interested in building scalable, high-availability backend systems and solving performance challenges in distributed environments.

Education

Global Institute of Engineering and Technology

Sep 2020 - June 2024

Bachelor of Technology in Information Technology | CGPA:7.5/10

Vellore, TN

Coursework: Data Structures Algorithms, Operating Systems, Database Management Systems, Object-Oriented Programming, Computer Networks, Cloud Computing (AWS), Artificial Intelligence, Software Development Life Cycle .

Technical Skills

Programming Languages & Databases: Python, SQL.

Backend: Node.js, Django, RESTful APIs, Unit testing, Agile Development.

Frontend : HTML5, CSS3, React, Angular.

Cloud & Infrastructure: AWS (EC2, S3, VPC, IAM) , GCP fundamentals, Linux, Server Deployment.

Concepts: Algorithm Design, Time Complexity Optimization, Competitive Programming , Debugging and Clean Code.

Tools: Git, GitHub, Visual Studio Code.

Internship Experience

Y Combinator Software Engineering Virtual Internship

Feb 2026 - Present

- Built full-stack features using React + backend APIs, focusing on usability and performance.
- Implemented API integrations and improved UI flows based on product requirements.
- Analyzed basic user metrics to validate feature impact and documented findings for iteration.

AWS Graduate Trainee - Cultus Technology Pvt. Ltd.

Oct 2025 - Jan 2026

Cloud Certification Program

- Configured AWS services including EC2, S3, IAM,VPC improving environment setup efficiency by 30% through optimized resource deployment.
- Implemented CloudWatch monitoring and IAM security best practices, lowering troubleshooting time by 20% and improving access security by 35%.

Projects

Task Management Backend Service with Secure Authentication

Nov 2025 - Dec 2025

- **Tech Stack:** Python, Django, SQLite (SQL), RESTful APIs, JWT Authentication, Git, GitHub.
- Developed a scalable backend system using Python and Django, focusing on backend development, debugging, and performance optimization using efficient data structures and algorithms.
- Designed scalable REST APIs with secure JWT authentication, focusing on low latency and high reliability.
- Achieved 30% improvement in API response consistency, data security through optimized queries, controlled user access.

Coffee Shop WebApplication Hosting on AWS

Sept 2025 - Oct 2025

- **Tech Stack:** AWS (EC2, S3, VPC, IAM, Security Groups), Python, Linux, HTML5/CSS3, Git.
- Deployed a secure cloud infrastructure using AWS (EC2, S3, VPC, IAM) and Linux, ensuring high availability.
- Improved application availability, Automated backend deployment and maintenance with Python Script and Git, improving operational efficiency.
- Reduced manual operational effort by 40% through automated deployment and optimized cloud resource management.

Explainable Artificial Intelligence Application in Cybersecurity

Aug 2025 - Sept 2025

- **Tech Stack:** Python, Django, SQL, HTML5, CSS3, JavaScript, Angular, Machine Learning.
- Built and maintained a backend-driven a full-stack web application using Python/Django and SQL to present clear security insights, functioning as a "customer-facing" internal tool.
- Deployed user-centric framework,automating threat response actions, enhancing network security response time by 30%.
- Developed dynamic frontend modules using Angular components, services, and routing, integrating secure REST APIs to deliver real-time cybersecurity insights.

Certifications & Achievements

- Certified AWS Cloud Practitioner Trained in cloud architecture, deployment, and enterprise infrastructure.
- IBM AI Certified Validated proficiency in AI implementation, confirming a data-driven approach to problem-solving.
- Certified Infosys Full-Stack Development web application, Angular, JavaScript, HTML5/CSS3, and API integration .
- Strong in Arrays, Hashing, Strings, Trees, Graphs, DP, and time/space complexity.
- Solved 200+ DSA problems problems regularly (LeetCode/HackerRank/CodeChef).
