Career Objective

- Graduated with a Bachelor's in Information Technology from Global Institute of Engineering and Technology.
- Demonstrate strong problem-solving abilities, a passion for learning, commitment to continuous professional growth.
- Aim to contribute to team success and support company objectives with a proactive and collaborative approach.

Education

Global Institute of Engineering and Technology **Sep 2020 - June 2024**
B.Tech in Information Technology | CGPA:7.5/10 *Vellore, TN*

TTD Sri Venkateswara Higher Secondary School **Aug 2018 - Mar 2020**
Computer Science *Vellore, TN*

Technical Skills

Languages: Python, HTML5, Css, JavaScript, Rest API, SQL.

Developer Tools: VS Code, PyCharm, GitHub.

Technologies/Frameworks: Django, React, Mongo DB, Google Workspace.

Internship Experience

Unified Mentor Private Limited **July 2024 - Sept 2024**

- **Analyzed** sales data using Sheets and SQL, identified anomalies in sales trends and seasonal patterns to drive strategic decisions.
- **Navigated** ambiguous tasks in employee attrition analysis to Identify turnover key factors and recommend insights.
- **Increased** data accuracy by **15%**, leading to a **25%** reduction in forecasting errors, Improving decision-making for strategic product launches by providing more reliable data inputs.
- **Worked** with cross-functional teams Developed **10+** dashboards, improving data clarity and elevating user engagement by **30%**.

Accenture Private Limited **Nov 2024 - Dec 2024**

- **Created** and delivered a detailed PowerPoint presentation comparing **Waterfall** and **Agile methodologies**, enhancing stakeholder understanding of project management frameworks.
- **Designed** a custom algorithm using pseudocode, and visualized its logic through a flow diagram, improving **communication** of technical concepts by **30%**.
- **Debugged** Python programs by identifying and fixing syntax and logic errors, increasing code efficiency and functionality by **25%**.

Projects

Explainable Artificial Intelligence Application in Cybersecurity **Mar 2024 - May 2024**

- **Tech Stack:** Python, Django, SQL, HTML, CSS, JavaScript, Bootstrap, Machine Learning.
- Enhanced network security response time by **30%** through the deployment of a user-centric framework.
- Deployed AI/ML models, boosting threat detection accuracy by **40%**, proactively identifying and security risks.
- Investigated cybercrime patterns, achieving a 25% reduction in unauthorized access through proactive threat mitigation.

Smart Parking Management System Using AI **Jan 2024 - Mar 2024**

- **Tech Stack:** Python, OpenCV, Deep Learning, AWS cloud .
- Optimized parking detection accuracy to over 90% using YOLO v3 trained models with a dataset 100+ parking images.
- Reduced system latency to under 2 seconds for vehicle tracking updates, enhancing efficiency by 30%.
- Analyzed system performance using trained datasets for parking and accident detection.

Certifications

- Google Workspace Certified Automated workflows.
- IBM AI Certified: Built an accurate AI car parking system with OpenCV.
- Infosys Full-Stack Development Developed Websites and Apps.
- Python for Data Science ML Focused on data analysis, visualization and ML.
- Certified in TCS NQT, highlighting technical and analytical proficiency.
- Certified in Typing Skills, demonstrating improved speed and accuracy.
